

Environmental Policy Statement

The Company recognises that its activities impact upon the environment both through its routine internal operations, its infrastructural development, and through its influence and effects on the wider community. It acknowledges a responsibility for, and a commitment to, protection of the environment at all levels.

The Company will comply fully with environmental legislation, other requirements and will have the following **objectives**:

- To implement and maintain an Environment Management System (EMS) in accordance with ISO14001:2015;
- To increase awareness of environmental performance and responsibilities among all staff;
- To minimise waste and prevent pollution and develop and operate environmentally sound waste management procedures;
- To continue to reduce the consumption of fossil fuels and to incorporate long term strategies for energy efficiency into planning and development;
- To promote efficient use of water;
- To promote a purchasing policy which will give preference, as far as is practicable, to those products and services which cause the least harm to the environment;
- To avoid, wherever practical, the use of environmentally damaging substances, materials and processes;
- To consider environmental factors in respect of the growth of the company, seeking as far as is practical to reduce harmful environmental impacts.

The Company will promote environmental management policies and practices at every level and in every department. We will develop, implement and maintain an Environmental Management System (EMS) and within this, we will set and review environmental objectives and targets, which we will review to ensure continual improvement of our performance. We will work with local and national agencies as appropriate to meet legislative requirements and our environmental objectives.

David Byrne, CEO
